PUBLIC HEARING

New Applications

A. COA 2021-11 – 103 Caroline Street – Chris and Jordan Hinkebein request approval to construct a two-story addition on the south side of this single-family residence.

Bob Steele, the project architect, was present to represent the application. There were no public comments.

Mr. Steele noted that a number of different additions had been constructed at this residence in the past and it was difficult to determine when each was made. He said the owners would prefer the six-over-six light pattern on the new windows and that the existing windows are all newer replacements. He noted that they would match the existing ogee gutters and downspouts on the new addition.

Ms. Moss noted that the replacement windows could still be considered historic. She said that either window pattern would be appropriate, but noted that thicker muntins might stand out. She asked Mr. Steele to clarify if the window in the bathroom would be frosted and for details on the carport columns. Mr. Steele said an interior storm window with frosted finish would be used and that the columns would be square, clad columns.

Ms. Ross said she thought the six-over-six window pattern was appropriate, but noted that the siding profile or other details could differentiate the new addition. She complimented the design of the open carport.

Ms. Weitzman said she was initially concerned about the size of the addition, but the elevation views show little alteration and the new forms are clearly subordinate to the original residence. She also noted that the modern materials, including fiber cement siding and the windows, will clearly differentiate themselves from the historic.

Mr. Whitman complimented the application and said he was in support of the six-over-six windows and the ogee gutters.

Ms. Irvin noted that the massing was sensitive to the original structure and well-designed. She noted that the new metal roof should be field-crimped and that the shutters should include operable hardware.

Chairman Gerlach said he was in agreement with the rest of the Board and that the fiber cement siding, massing, and new six-over-six windows would clearly differentiate the new construction. He recommended that the owners consider pervious paving, rain barrels, or other methodologies to combat additional runoff from the new construction. He also noted that larger windows could be used on the rear elevation if desired, as this was not within the Board's purview.

The application will be included on the March 22, 2021 meeting agenda for action.

- B. COA 2021-12 – 101 Pitt Street – Thomas Wack requests to make alterations to this single-family residence including removing a non-original chimney and enclosing a courtyard between the house and garage.

Charles Aquino, the project architect, was present to represent the application.

All Board members spoke in support of the application and noted that it meets the standards and guidelines for the Historic District. The application will be included on the March 22, 2021 meeting agenda for action.

GENERAL PUBLIC COMMENT

The Historic Fredericksburg Foundation, Inc. submitted comments to note that the organization had no concerns with the applications submitted.

OTHER BUSINESS
