

CERTIFICATE OF COMPLIANCE WITH ASBESTOS REGULATIONS  
City of Fredericksburg - Building and Development Services

As required by Section 36-99.7 of the Code of Virginia and Section 108.10 of the Uniform Statewide Building Code, this certification shall be completed and signed by the owner or authorized agency of any property to be renovated or demolished before any permits are issued by this office.

**If the property is exempt**, please **indicate** so by marking the appropriate box and affixing the signature of the owner or agent in the appropriate spaces.

Date of Application \_\_\_\_\_ Permit Number \_\_\_\_\_

LEGAL description of the property \_\_\_\_\_

Describe work to be performed. *If* only a portion of the structure is to be renovated and demolished, a sketch or set of construction drawings are to be attached to the application.

\_\_\_\_\_

Please check the appropriate box

- I certify the area to be renovated or demolished is assumed to contain asbestos and that asbestos installation, removal or encapsulation will be accomplished by licensed asbestos contractor.
- The owner is attaching certification that the sampling of the material to be renovated or demolished was accomplished by a licensed asbestos inspector as defined in Section 54.1-500 and analysis of the sample showed no asbestos to be present
- I certify the area to be renovated or demolished has been inspected by a licensed asbestos inspector and am attaching certification that asbestos is present and will be removed or encapsulated by a licensed asbestos contractor.
- This property is exempt from the requirements of the applicable codes or regulations because the property is a single family dwelling or residential housing with four and or fewer units and is not being renovated or demolished for commercial or public development purposes. This exemption does not apply to residential property under the control of local government.
- The combined amount of regulated asbestos involved in the renovation or demolition is less than 260 linear feet on pipes, or less than 160 square feet on facility components or less than 35 cubic feet of facility components where the length or area could not be measured previously.
- The building was constructed after January 1, 1985.
