Mayfield Community Update - March 2022

Propane Volume Update

With warming weather, March saw a decrease in propane cars through the Fredericksburg Yard compared to February as anticipated. Our customer's car orders for April are roughly 30% less than March. We expect a slight decrease from April to May before leveling off of car volumes through the remainder of the spring and summer.

These are estimates subject to change and offered in an effort to be as transparent as possible. Regardless of number of cars, CSX wants the community to know that cars move everyday as part of efficient and safe local service and cars are not stored in the yard.
